AI-PDLC Hackathon

Judge brief · Demo day · 25 October 2026

Thank you for judging

Teams of four students (a Business Analyst, a UI/UX designer, a Developer and a QA lead) took a real problem from idea to working prototype in a day and a half, using AI at every step. You do not need a technical background to judge: every question below is about what you can see and hear in the demo.

Your track: 5 teams, 15 minutes each, about 10 minutes of demo and 5 minutes of your questions.
Score each team straight after its demo, before the next team starts. Use the sheet on the next page; score on your own, without conferring with your co-judge.

Rating scale

1 Not shown	**2** Weak	**3** Partly convincing	**4** Convincing	**5** Outstanding

The five questions

Question	What to look for	A good question to ask
1. Problem Is it clear who has the problem and why it matters to them?	A named user, a real situation, and a reason it matters.	“Who exactly is this for?”
2. Solution Does the product solve that problem, with sensible choices about what to build and what to leave out?	The product fits the user’s problem. The team cut features on purpose and can say why.	“What did you decide not to build, and why?”
3. Working prototype Did you see it work live, doing what the team said it would?	It runs in front of you. A backup recording is acceptable if the live demo fails; score what you see working.	“Can you show that again with different input?”
4. Teamwork and presentation Was the story clear, did all four members contribute, and did they handle questions well?	A clear story from problem to product. All four members speak or demo. Confident, honest answers.	“What did each of you own?”
5. Use of AI Could the team explain how AI helped them, and where it got things wrong?	Specific examples of AI at work, and at least one mistake the AI made and how the team caught it.	“Where did the AI get it wrong?”

When your track ends

1. Add up each team’s total out of 25.
2. Rank your five teams from 1 (best) to 5. No two teams share a rank. If totals tie, the team with the higher **Working prototype** score ranks higher.
3. Add one line of feedback per team if you can. Students receive these comments.
4. Sign the sheet and hand it to the track coordinator. Results are announced after the event.

Score sheet · One sheet per judge

Judge name: _____ **Track no.:** _____ **Signature:** _____

Score each question 1–5: 1 Not shown · 2 Weak · 3 Partly convincing · 4 Convincing · 5 Outstanding

Question	Team 1 Name: _____	Team 2 Name: _____	Team 3 Name: _____	Team 4 Name: _____	Team 5 Name: _____
1. Problem Is it clear who has the problem and why it matters to them?					
2. Solution Does the product solve that problem, with sensible choices about what to build and what to leave out?					
3. Working prototype Did you see it work live, doing what the team said it would?					
4. Teamwork and presentation Was the story clear, did all four members contribute, and did they handle questions well?					
5. Use of AI Could the team explain how AI helped them, and where it got things wrong?					
Total (out of 25)	/ 25	/ 25	/ 25	/ 25	/ 25
Rank in your track (1 = best, no ties)					
One thing done well (optional)					
One thing to improve (optional)					

Tie on total: higher Working prototype score ranks higher. Hand this sheet to your track coordinator.
